PROFESSIONAL SUMMARY

Backend Developer with 1 year of experience building and deploying scalable, high-performance systems using Python, FastAPI, and SQL databases. Skilled in designing REST APIs, asynchronous architectures, and multi-tenant applications. Hands-on experience in Linux server management, cloud deployment, caching with Redis, and background processing using Celery. Proven ability to build real-time systems, optimize backend performance, and manage production environments.

TECHNICAL SKILLS

Languages: Python, SQL

Backend: FastAPI, Django, REST API, API Design, CRUD Operations, SQLAlchemy, Alembic, Async, WebSocket, Socket.io |

Authentication & Security: JWT Authentication, RBAC, OAuth2

Databases: MySQL, PostgreSQL, SQLite, Redis | **DevOps:** Docker, Git, Celery, Jira, Supabase, CI/CD Basics, Postman

Cloud: AWS, DigitalOcean | **Testing:** Pytest, API Testing, Linux

PROFESSIONAL EXPERIENCE

Jr. Backend Developer – DigiDxDoc Health Solution Pvt.Ltd

Apr 2025 – Present

- Built scalable REST APIs using FastAPI and SQLAlchemy with modular architecture and role-based access control.
- Developed and maintained backend services for healthcare applications, including RESTful APIs and database-driven solutions.
- Implemented secure authentication, authorization, background tasks, automation, and notification workflows.
- Optimized application performance, supported production deployments, and collaborated with cross-functional teams to deliver scalable solutions.

Data Science Intern – HumbleMind

Sep 2024 – Oct 2024

- Developed energy consumption forecasting models using Python achieving 88% accuracy with LSTM and Random Forest
- Performed data preprocessing on 50,000+ records using Pandas with feature engineering and anomaly detection

AI Intern – Infosys Springboard

Mar 2024 – Jun 2024

- Designed ANN model predicting student academic performance with 87% accuracy using TensorFlow and Keras
- Implemented data preprocessing, feature scaling, and model evaluation achieving early identification of at-risk students

ML Intern – Compsoft Technologies

Aug 2023 – Oct 2023

- Built voice assistant using Python, OpenCV, and Google Cloud Vision API for visually impaired users
- Integrated Dialogflow for conversational AI with 90% recognition accuracy across various environments

PROJECTS

Hospital Health Prognostication ML System

Sep 2023 – May 2024

- Built predictive model using Random Forest and CNN achieving 92% accuracy in patient outcome prediction
- Performed data preprocessing with Pandas and hyperparameter tuning, improving model performance by 15%

Real-Time Facial Emotion Recognition

Mar 2023 – Jun 2023

- Developed CNN-based emotion recognition system with 85% accuracy processing 30 FPS live video streams
- Created responsive web interface using HTML, CSS, JavaScript with WebSocket for low-latency communication

EDUCATION

RNS Institute of Technology, Bengaluru

Jun 2020 – Jun 2024

Bachelor of Engineering in Artificial Intelligence & Machine Learning

CERTIFICATIONS

- Python full stack course – pentagon space
- Introduction to Data Science – Cognitive Class IBM (Jul 2023 - Oct 2023)
- Introduction to Artificial Intelligence – Infosys Springboard (Jan 2024 - Feb 2024)
- Deep Learning – Infosys Springboard (Jan 2024 - Mar 2024)
